

## Bullying Prevention Talk

*A study done by the American institute of science (2015) reports that of 1,054 students in the UAE 40% had been victims of bullying. Additionally the UAE School Safety Survey 2016 noted that bullying was the top school safety concern for UAE-based parents. In this talk you will learn strategies to detect bullying behavior and ways to prevent it. It will also cover the latest research and recommendations on school based programs that tackle bullying behavior.*
